

IAAH CONGRESS 2017: PRE-CONGRESS SKILLS BUILDING WORKSHOP 10
Thursday October 26th

WORKSHOP TITLE	Health screening of adolescents in a busy clinical setting
RATIONALE	<p>The majority of adolescent morbidity and mortality is preventable and associated with behaviors such as substance use and abuse, unsafe sexual practices, road accident, and mental health issues.</p> <p>Current trends in adolescent morbidity and mortality have turned greater attention to the preventive role of the health care system.</p> <p>The majority of adolescents visit a health care provider once a year (often in emergency), providing an ideal opportunity to integrate prevention into clinical encounters.</p> <p>The workshop will provide pragmatic approaches and tools on how to screen and manage adolescents in a busy clinical setting</p>
Facilitator(s):	<p>Dre AE Ambresin, paediatrician, adolescent health specialist Lausanne, Switzerland Anne-emmanuelle.ambresin@chuv.ch</p> <p>Dre. Anuradha Shivaram., adolescent health specialist Bangalore, India dranuhs@yahoo.com</p>
Taking place:	Morning
Training objectives	<ol style="list-style-type: none"> 1. Define health screening needs and how it differ according to regions of the world 2. Discuss different screening tools available 3. Reflect on ways to provide good health screening in a busy clinical setting 4. Practice communication skills with an adolescent in a busy clinical setting
Facilitation techniques	<ul style="list-style-type: none"> • Discuss and report the main challenges for practitioners in a busy clinical setting (VIPP tool) • Group work on screening tools (work with internet to illustrate tools to the others) • Interactive presentations (guidelines for screening, barriers to screening, what works, what doesn't work to be efficient) • Role play: health screening with an adolescent in a 10 minutes consultation
